

C&NWS Members Model Show announced for 2011

The models may be of any scale, construction technique or category. Models under construction will be welcomed. The modeler may show as many models as desired and is encouraged to provide information describing the techniques used in building the model, a parts list, construction photos, prototype photos or anything else that will stimulate conversation about the models. A PDF information sheet can be found at <http://www.cnwbs.org/relitemdocs/1245338340.pdf>. This will also be your claim check and a good way for us to highlight some of the models in Northwestern Lines and the Web Modeler.

The member's name must be displayed with the model. The goal is to encourage an open dialog among the members about the models displayed.

We will again have a peoples choice award, the model that best represents Peoria, and special judge awards.

A panel of judges will select one model to receive the Lloyd Keyser Best of Show Award.

We would like to encourage modelers to bring photos of their models and layouts. An area will be set aside for the model photo display.

Questions can be sent to cnwbs@cnwbs.org
